

INBRED MAIZE LINE PH6WG

Brian Douglas Swanson

Abstract

5 An inbred maize line, designated PH6WG, the plants and seeds of inbred maize
line PH6WG, methods for producing a maize plant, either inbred or hybrid, produced by
crossing the inbred maize line PH6WG with itself or with another maize plant, and hybrid
maize seeds and plants produced by crossing the inbred line PH6WG with another
10 maize line or plant and to methods for producing a maize plant containing in its genetic
material one or more transgenes and to the transgenic maize plants produced by that
method. This invention also relates to inbred maize lines derived from inbred maize line
PH6WG, to methods for producing other inbred maize lines derived from inbred maize
line PH6WG and to the inbred maize lines derived by the use of those methods.
